The Child Death Review Process is an established process to enable Kirklees Safeguarding Children Partnership (KSCP) and partners to learn lessons from child deaths and make any changes or recommendations highlighted and discussed at the Child Death Overview Panel (CDOP).

eCDOP is a new online secure system which uses the standard forms provided by the Department for Education, therefore if you have had to report a child death previously, the forms will be familiar to you.

eCDOP allows professionals to make initial notifications about a death direct to the KSCP in a secure manner.

Initial Notifications are completed using a Form A.

In addition it will allow the CDOP administrator to request additional information from involved agencies.

This further information is completed on a Form B.

Working Together to Safeguard Children 2018 chapter 5.

All child deaths (from birth up to 18th birthday) who were a resident of Kirklees must be reported immediately to the KSCP (Working Together to Safeguard Children 2018).

The Child Death Overview Panel (CDOP) is a panel of the KSCP and reviews each death to identify how many child deaths were either avoidable or potentially avoidable.

The more we can understand about how and why children have died, the more we can collectively learn. This allows the KSCP to look at patterns and trends.

All deaths, expected and unexpected are looked at by CDOP, whether it is an incurable health problem, where there is no obvious cause or due to an accident.

The KSCP has a secure portal (eCDOP) that allows you to notify us of a child death via a **Form A**. The link is on the KSCP website under the professionals section [Child Death Overview Panel - KSCP \(kirkleessafeguardingchildren.co.uk\)](http://kirkleessafeguardingchildren.co.uk)

The CDOP administrator will gather as much information about the child known to the agencies and you may be sent a link to complete a **Form B**, this is your agency report form.
